

Why Grams will be traded on Blackmoon?

Blackmoon

Follow

Sep 13 · 3 min read

Traders will have access to Gram tokens on the Blackmoon Exchange right after Telegram Open Network launch. Real on-chain Grams, available for withdrawal to Telegram native wallet. No lock-up. No futures or other derivatives.

To provide our clients with access to Grams, Blackmoon partnered with Gram Vault — a Swiss-regulated custodian for the original investors of Telegram Open Network. This will make on-chain Grams available on Blackmoon when Telegram blockchain goes live and Grams are minted.

Blackmoon invested resources in IT development and compliance to make this happen.

1. **IT efforts** resulted in a significantly expanded functionality for the users:

- Market, limit, stop and stop-limit orders conditional on market movements;
- Powerful chart tools with multiple tabs;
- Price alerts and customized trading workspaces;
- More than 200 trading pairs including tokenized assets.

2. On the **compliance side**, Blackmoon operates under the provisions of MFSA’s Virtual Financial Assets Act. Because of this, traders can purchase cryptocurrencies and Grams with debit and credit cards.

3. To provide clients with an additional layer of **security**, we completed an IT audit with a Big 4 company. The auditors assessed the underlying network and infrastructure as well as the design and implementation of the solutions. The tests were both automated and manual using both authenticated and non-authenticated approaches.

As a result, the auditors concluded that the risks were insignificant:

Insignificant

No or minimal impact on some parts of the Confidentiality, Integrity and Availability of the corporate Information Systems.

Thanks to all these efforts Blackmoon users will be able to trade Grams as soon as TON goes live.

If you are a registered user, you are all set. If you are a new user, register an account to trade with cryptocurrencies or verify to get access to fiat.
